SAFETY POLICY

It is a universally accepted fact that accidents don't just happen; they are caused by human error and negligence. During accidents, considerable damages to property and sometimes to human lives are observed. The best way to eliminate such accidents is to make a Safety and Loss Prevention Program and the strict implementation/observance of it.

This Safety and Loss Prevention Program contains various activities common in every construction works.

In any business the worker is the most valuable asset. Because of this philosophy the safety and welfare of its workers has been the primary concern of Powerlinks Contracting Company management towards its workers.

The ideas discussed in this manual were based from the diversified experience of people who have been involved in the prevention of construction loss due to accidents or injuries. The suggested procedures presented in this manual in dealing with the majority of these hazards will enrich one's safety consciousness. In general, the safety of every worker shall be the primary concern and that safety is everybody's job.

The responsibility of carrying out this safety policy is not constraint on the part of the contractor only but to it sub-contractor(s) as well. Sub-contractor(s) must ensure that all their personnel are familiar with Safety and Loss Prevention Program and they must adhere to it.

Strict implementation of everything presented here should be given importance and concern. A strict compliance of this project Loss Prevention Program will lessen if not eliminates accidents.

Very Truly Yours,
POWERLINKS CONTRACTING COMPANY LIMITED (PLCC)
