

Quality Assurance and Quality Control Policy Statement

The management of Power Links Contracting Establishment (PLCC) is wholeheartedly dedicated to the maximum use of our company's QA and QC programs and procedures for all materials supplied to our projects and for all work accomplished under our name whether the work is done by our own forces or by subcontractors.

We recognize that quality assurance is an on going inter disciplinary function involving our total organization. We know that the responsibility for quality assurance and quality control must extend to all levels and divisions within our organization.

We insist that all of our management and supervisory personnel make sure that all men under their responsibility scrupulously follow the PLCC quality assurance and quality control programs at all times.

John M. Bosco
General Manager
